

K-LOVE serves us. We live in the Sierra mountains and there is no TV receptions here, but we do get radio at times and it is very welcomed. K-LOVE has a very positive affect on our lives because their broadcasts match our likes exactly. K-LOVE is uplifting, informative, and a great influence on our lives.

This is a rural area and we drive long distances it would be annoying in the least to have to retune the channel frequently to obtain K-LOVE's broadcasting or something like it. The disruption would not be a good service to the broadcasters or those they serve. Regional services are needed in areas like ours where long commutes are common for everyday chores.

We want and need K-LOVE. Please do not do anything to hurt their broadcasts.

Sincerely,
Al & Anita Foytek
